Bottled Water WITHOUT THE BOTTLE!

FREEDOM FROM:

- ◆ Bottle storage
- ◆ Inconvenience of deliveries
- ◆ Bottle Deposits
- ◆ Fluctuating monthly bills
- ◆ Running out of water
- ◆ Water damage from leaky bottles
- ◆ Lifting heavy bottles

It's So Simple!

Your water cooler's reverse osmosis (RO) filtration system improves the taste and odor of your drinking water and substantially reduces microscopic impurities and chemical elements. With reverse osmosis, water passes through an ultra-thin,

Cooler provides up to 2 bottles of water per day

- ◆ Larger systems available
- ◆ Standard Room Temperature and Cold Faucets.
- ◆ Optional Hot Tap for tea, instant coffee, hot chocolate, etc.
- ◆ A high performance Reverse Osmosis system - the heart of most bottled water operations—treats your water on-site.

semi-permeable membrane, which filters unwanted particles, including sodium and lead. The result is the deliciously clear water you'd expect from a bottle – but without the hassle.

It is a cost-effective solution that will give your home or business great tasting water for years to come. Kitchens, staffrooms, meeting rooms, waiting rooms and display areas—make good drinking water convenient and it will be appreciated.

Systems are available for rent or purchase and our service technicians can look after the maintenance requirements.

- ◆ Hot and Cold faucets
- ◆ In Tank Ozonation
- ◆ 3 gallon internal storage

ARE YOU GETTING ENOUGH WATER?

Your body is approximately 66% water. Natural elimination and digestions means a loss of 8 to 10 cups daily. Although you may not feel thirsty, it's in your best interest to hydrate your body throughout the day. A healthy intake of water each day assists in the proper functioning of your inner organs. An abundance of fresh water also benefits the body's largest organ - the skin - keeping it smooth and supple. Try 8 glasses a day.

H₂O Info . . .

- ◆ Dehydration will make you feel sluggish
- ◆ Water is a vital aspect of digestion and metabolism.
- ◆ Toxins and impurities are flushed by water.
- ◆ Disease fighting cells are transported through the bloodstream via water.
- ◆ Water in its pure form, replenishes natural fluids that are depleted by caffeine and alcohol.
- ◆ Water plays an important role in the body's cooling system.

Clean water.

Maintenance

The key to good drinking water is selecting the right system for your needs and maintaining it properly.

An appropriate maintenance schedule will be developed based on your choices and water consumption.

Maintenance may be performed by your staff (with any required training or instruction) or by our fully trained and certified technicians. Rental includes all parts, maintenance items and service.

Our local technicians are also dispatched locally.

Pricing

Pricing is based on systems selected, number of units, maintenance requirements, sizing, water consumption, etc. After a detailed analysis, we would be please to provide a firm proposal.

NOTE: Many existing water coolers may be converted for use as a bottleless cooler. Pricing available on request.
